Thesis management System

Due to covid-19 outbreak, most of our work turned to online. So we wanted to built a website to manage the thesis of undergrad and graduate students of NSU.

Mainly in our website there will be a portal for teacher or supervisor who will create their profile using their mail address and faculty id also filling others necessary information. Teacher will post notice for paper submission deadline and other submission guideline through our website. Teacher will have the control to open a portal for the student to submit their thesis.

For students there will be also a portal which student can access through registering themselves with their mail and student id. Here they can will find the notice and deadline posted by their chosen faculty. They can send thesis proposal to their selected faculty and submit their thesis through the portal created by the teacher.

Here admin panel will maintain all the process and monitor whole system.

Feature description:

Home page:

There will be a home page where the sign up and in portal will be presented.

Sign Up & Sign in:

Teacher and and students both will found different sign up window.

Teacher portal:

There will be a Notice page, message window, submitted paper, feedback window.
